THE *Wildlife* HABITAT MANUAL

1000 Friends has just released *Wildlife Habitat Planning Strategies, Design Features and Best Management Practices for Florida Communities and Landowners*. This lavishly illustrated, full-color publication focuses on strategies to integrate wildlife habitat planning into local and regional planning efforts. The manual will be a valuable resource for community planners, landscape architects, landowners, developers and community-minded citizens.

Topics include the importance of designing wildlife-friendly communities, basic principles, data and

analysis needs, visioning, a Florida-specific toolbox, management and design factors, transportation design, golf course design, and rural area conservation. Users will find sample goals, objectives and policies for local comprehensive plans as well as case studies of success stories and references.

1000 Friends Community Planner Dan Pennington coordinated the project, which builds on the Florida Fish and Wildlife Conservation Commission's *Wildlife Legacy Initiative and Comprehensive Wildlife Conservation Strategy*. "Our goal," Pennington explained, "is to minimize the impacts of development on the state's rich natural resources and wildlife habitat through creation of a green infrastructure for Florida."

Project partners include the Florida Fish and Wildlife Conservation Commission, Florida Wildlife Federation, and Florida Department of Community Affairs. Additional funding was provided by the Elizabeth Ordway Dunn Foundation, the Batchelor Foundation, Jane's Trust and the Martin Foundation. A Technical Advisory Committee comprising some of the state's leading planners, biologists and others engaged in wildlife habitat conservation assisted with development of the manual.

The manual is available on-line at www.1000friendsofflorida.org.
